HEALING WATERS FROM ANTIQUITY

Science that matters

The Omorovicza journey began when the **healing properties of Hungary's thermal waters** were discovered. Because of the unique geological features of the region, waters absorb beneficial minerals more effectively and that unique mix of minerals and trace elements make them incredibly healing.

With Hungarian Laboratory of dermatology they incorporated properties of healing waters into a skincare range. Patented complex - Healing Concentrate™, used in products, delivers therapeutic minerals to deepest layers of the skin.

The results are nothing short of extraordinary: firmer, suppler & younger looking skin.

ZERO NASTIES POLICY: all products exclude ingredients such as parabens, glycols, mineral oils, silicone, phthalates, sodium lauryl sulphate, synthetic colours, synthetic fragrances or chemical sunscreen.

Hungarian moor mud

Organic acids and essential minerals from deeper layers of the earth.

Hungarian moor mud is a remarkable natural substance. **Sourced from Lake Héviz** – Europe's largest thermal lake – this potent ingredient lies beneath the water's surface.

It is rich in transformative minerals and acids like **calcium, humic and fulvic acids**, which have been used for thousands of years. The skincare benefits of Hungarian moor mud were first realized by the Romans when the wounds of their injured horses healed faster after they ploughed through the mineral-rich mud.

PROPERTIES: detoxifies, balances, mineralises and revitalises. Among these advantages is its ability to remove impurities, regulate sebum production, and combat breakouts.

The nourishing elements from the precious blend of minerals, trace elements and acids are thought to work harmoniously to deeply cleanse and detoxify your complexion. They could also infuse your skin with healing properties and provide a protective shield to fight off any environmental aggressors that may disrupt your skin barrier.

Whether you've got sensitive, dry or combination skin, unique and powerful Omorovicza Moor Mud collection has so many benefits to offer your complexion.

A large, artistic photograph showing a hand applying a thick, dark, textured substance (Hungarian moor mud) to the face. The background is a dark, textured surface, possibly sand or a similar material, creating a moody and natural aesthetic.
